

Coloured Sensory

Yellow Lemon Bin

What You Will Need

- Coloured dry rice
- Cups
- Lemon Juice
- Plastic Bin

- Step 1: Measure one cup of rice into a container with lid
- Step 2: Add one teaspoon of lemon juice (pretty strong scent with this amount, adjust to preference)
- Step 3: Add the desired amount of food coloring
- Step 4: Spread on a paper towel and let dry (30 mins for ours)

Having a bin with some different materials can be a great way for children to focus their attention. Offering items such as coloured rice or pasta with some cups or scoops is an excellent way for children to practice scooping and pouring. Scooping and pouring is an important developmental skill for children to learn because it helps them discover volume and capacity as well as cause and effect.
